

COVID-19: summary of persons being monitored, persons tested, and cases

Data through Jul 13, 2020 verified as of Jul 14, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of an airline/ship contact investigation

Total reports	98,864
Total persons of high, medium, or unknown risk	95,178
High/medium/unknown risk still being monitored	15,024

Persons tested: includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories

Total tested	2,688,366
Positive	291,629
Negative	2,393,614
Inconclusive	3,123
Awaiting testing	2,057

Cases: people with positive PCR or antigen test result

Total cases	291,629
Florida residents	287,789
Non-Florida residents	3,840

Type of testing	
Florida residents	287,789
Positive by BPHL/CDC	10,101
Positive by commercial/hospital lab	277,688
Non-Florida residents	
Positive by BPHL/CDC	169
Positive by commercial/hospital lab	3,671

Characteristics	
Florida residents hospitalized	18,881
Florida resident deaths	4,409
Change in deaths since previous report	+132
Non-Florida resident deaths	105

Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.

More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm.

Risk factors for Florida residents	
Traveled	2,922
Contact with a known case	77,771
Traveled and contact with a known case	2,846
Neither	204,250
No travel and no contact	28,843
Travel is unknown	145,875
Contact is unknown	43,853
Contact is pending	128,481

Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.

COVID-19: cases and laboratory testing over time

Data through Jul 13, 2020 verified as of Jul 14, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Cases in Florida residents per day for the past 2 weeks

Number of cases per day

Median age of cases by day

Laboratory testing for Florida residents and non-Florida residents over the past 2 weeks

Number of people tested per day

These counts include the number of people for whom the department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

Number and percent of positive labs

The percent of positive results ranged from 12.90% to 20.71% over the past 2 weeks and was 18.31% yesterday.

These counts include the number of people for whom the department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

Percent positivity for new cases

The percent of positive results ranged from 11.25% to 18.45% over the past 2 weeks and was 15.02% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

COVID-19: characteristics of 287,789 Florida resident cases

Data through Jul 13, 2020 verified as of Jul 14, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

COVID-19: testing by laboratory

Data through Jul 13, 2020 verified as of Jul 14, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Jul 13, 2020 verified as of Jul 14, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**
